Transportation Service

Respirators and Oxygen Policy

The North Township Trustee's Office, Dial-A-Ride department, will not deny transportation to passengers who may travel with respirators, portable oxygen, and other life-support, provided such transport does not violate laws or rules related to the transportation of hazardous materials. Potential passengers are reminded, at the time of the transportation request, that DAR is not a medical transportation service and are thus limited as to the types of additional assistance that can be offered by the driver. Passengers with oxygen are also made aware that other passenger stops may be scheduled along the route. Passengers with said equipment may want to consider using a medical transportation service and/or travel with a personal care attendant.
